Brand Book

**Published by authority of the Minister of
Agriculture for the Province of Alberta
and the Commissioner of Agriculture
for the Province
of Saskatchewan.**

**Revised and corrected to
January 1st, 1907.**

PREFACE.

This Brand Book is compiled from the Records in the Brand Recorder's Office at Medicine Hat. While the greatest possible care has been taken to ensure accuracy, it is quite possible, where so many thousand brands are involved, that mistakes have occurred. Where such are found, the Recorder will be glad to have them pointed out for correction in next year's supplement. It must be borne in mind, however, that a brand cannot be altered in the body of the Brand Book unless it is first changed on the records.

Owing to the manner in which the older series of brands were prepared and entered upon the records, it has not been found possible to arrange these alphabetically. For instance, the series B B and numerals will all be found under the letter B, although it may read 2 B B or 0 B B, while the single letter and numeral series with bar or other design, although reading—5 C or $\hat{6}C$ will be found under the letter C.

JAMES WILSON,

Recorder of Brands.

Fleming's Lump Jaw Cure is not an experiment, but a demonstrated success. Your money refunded if it ever fails.

HALF - TONES

are the most perfect as well as the most economical means of reproducing photographs in print. This kind of engraving is made in several degrees of fineness of screen to accommodate the half-tone to rough and smooth paper, smooth surface paper, and fine-screen half-tones—if made as **The Stovel Company** make them—produce the most perfect results.

The difference in the quality of half-tones is greater than the difference in quality of photographs. You would not employ an unskilled photographer to make your photos. You should employ **The Stovel Company** to reproduce them.

Let us know the quality of paper you print on in ordering half-tones.
